

## **Noida International Airport selects SITA's airport management system for efficient operations and to boost collaborative decision making**

*The partnership will help Noida International Airport to manage resources effectively, provide a live and transparent view of airport operations and work collaboratively with its airport partners*

**National - 07 July 2023** – Noida International Airport (NIA) has selected SITA's Airport Management System to help automate and streamline the operations of the airport. SITA's AMS will support NIA's integrated approach to airport operations, focusing on maximizing efficiency to serve passengers and airlines.

Ultimately, along with real-time information sharing via the SITA Information Display System, SITA's suite of systems will support a premium passenger experience at Noida International Airport.

The agreement includes the provision and operation of systems to allocate gates and counters, boarding bridges, manage traffic flows on the airfield as well as display flight information to passengers. SITA will help Noida International Airport with reliable flight information and planning capabilities. The system will empower the airport to review performance, strategize operational efficiency improvements, and capture resource utilization statistics.

Under this partnership, SITA will deliver a customized solution that offers flexibility and transparency for all airport partners to ensure smooth and efficient operations. The partnership aims to establish a platform for collaborative decision-making vital for achieving operational efficiencies at Noida International Airport.

**Mr. Christoph Schnellmann, Chief Executive Officer, Noida International Airport**, said: "We are delighted to partner with SITA for our Airport Management System. SITA has repeatedly demonstrated their ability to deliver solutions that cater to India's unique requirements. We are confident that their expertise and innovative technologies will help us to manage our airport resources efficiently, ensuring a seamless travel experience for the passengers."

**Mr. Sumesh Patel, President of Asia Pacific, SITA**, said: "We are proud to be chosen as the AMS provider for Noida International Airport, our first greenfield deployment in the Indian Sub-Continent (ISC) region."

"This partnership is a significant achievement for SITA, as greenfield airports exercise utmost caution in selecting their AMS partners. With over 20 customized integrations, NIA will join the league of highly technologically efficient airports, benefiting from a single-window solution and our managed service expertise, including 24/7 onsite support."

SITA will work closely with Noida International Airport to deliver a future-ready solution that offers flexibility and agility to meet evolving needs.

**ENDS**

#### **About Noida International Airport**

Noida International Airport (NIA) will connect the greater Delhi area and Western Uttar Pradesh with other cities in India and the world. This world-class airport will combine Swiss efficiency and Indian hospitality to offer rich experiences and comprehensive commercial attractions and services to its passengers. NIA will be the first airport in its class in India to achieve net zero emissions, setting a new standard for sustainable airport operations. For more information, please visit [www.niaairport.in](http://www.niaairport.in). Connect with us on [Facebook](#), [Twitter](#), [Instagram](#), and [LinkedIn](#).

#### **About Yamuna International Airport Private Limited (YIAPL)**

Yamuna International Airport Private Limited (YIAPL) was established for the development, construction and operation of the greenfield project - the Noida International Airport. The company, a 100% subsidiary of Zurich Airport International AG, will be responsible for the implementation of the public-private partnership project in close partnership with the Government of Uttar Pradesh and the Government of India. The concession period for Noida International Airport commenced on October 01, 2021 and will run for 40 years. At its projected opening at the end of 2024, the airport will feature one runway and one terminal and handle a capacity of 12 million passengers – with the potential for further development in additional construction phases. j

#### **About SITA**

SITA is the air transport industry's IT provider, delivering solutions for airlines, airports, aircraft and governments. Our technology powers more seamless, safe and sustainable air travel.

With around 2,500 customers, SITA's solutions drive operational efficiencies at more than 1,000 airports while delivering the promise of the connected aircraft to customers of 18,000 aircraft globally. SITA also provides technology solutions that help more than 70 governments strike the balance of secure borders and seamless travel. Our communications network connects every corner of the globe and bridges 60% of the air transport community's data exchange.

SITA is a certified CarbonNeutral® company in accordance with The CarbonNeutral Protocol – the leading global standard for carbon neutral programs. We are reducing our greenhouse gas emissions for all our operations through our UN recognized Planet+ program, while also developing solutions to help the aviation industry meet its carbon reduction objectives, including reduced fuel burn and greater operational efficiencies at the airport.

SITA is 100% owned by the industry and driven by its needs. It is one of the most internationally diverse companies, providing services in over 200 countries and territories.
