

Noida International Airport Strengthens Connectivity with Electric Vehicles Fleet

~ Availability of cabs 24 hours a day and 7 days a week~

~ Multi-channel cab booking including dedicated mobile app, website, call center, airline alliances, and airport kiosks~

Noida/New Delhi, December 12, 2024– Noida International Airport (NIA) partners with Mahindra Logistics Mobility to offer a premium, all-electric taxi service for passengers flying from the airport. Under this partnership, Mahindra Logistics will operate a fleet of 100% electric vehicles, offering passengers a comfortable and environmentally friendly ride. The service will feature premium pickup and drop-off facilities located directly at the arrival and departure kerbs, minimising walking distances.

The collaboration will ensure seamless and sustainable transportation options for travellers arriving at and departing from NIA, 24 hours a day and 7 days a week. Passengers will be able to book rides through various channels, including a dedicated mobile app, website, call centre, airline alliances, and airport kiosks. This multi-channel approach will guarantee accessibility and ease of booking for all travellers.

Christoph Schnellmann, CEO, Noida International Airport, said *“At NIA, your journey will not end with baggage claim. We are excited to partner with Mahindra Logistics Mobility to offer a premium, all-electric taxi service, to provide a seamless and environment-friendly ride directly from the airport to your destination. This first-of-its-kind airport-branded cab service will set a new benchmark for passenger convenience and environmental responsibility. This partnership is also a testament to our commitment to providing a best-in-class passenger experience, from the moment they arrive at the airport to the moment they depart for their destination.”*

Mahindra Logistics Mobility's operational model also focuses on safety and efficiency. Drivers will undergo rigorous training on airport protocols and customer service standards, ensuring high-quality interactions with passengers. The fleet will be managed with a focus on real-time dynamic adjustments based on passenger demand and flight schedules, reducing wait times, and extending service availability. The service will also incorporate a robust feedback mechanism to continuously monitor and improve service quality.

This partnership also underscores NIA's commitment to sustainability with an all-electric fleet that aligns with NIA's vision for a green and environmentally responsible airport.

Noida International Airport will combine Indian warmth and hospitality with Swiss technology and efficiency to develop a modern, user-friendly design, inspired by India. The first phase of the airport will feature one runway and one terminal, with the capacity to handle traffic of 12 million passengers annually. Upon completion of all four development phases, the airport will be able to cater to 70 million passengers per year.

About Noida International Airport

Noida International Airport (IATA code - DXN) will connect the greater Delhi area and Western Uttar Pradesh with other cities in India and the world. This world-class airport will combine Swiss efficiency and Indian hospitality to offer rich experiences and comprehensive commercial attractions and services to its passengers. NIA is committed to an ambitious net-zero emissions goal supported by sustainable design and operations principles.

Yamuna International Airport Private Limited (YIAPL) was established for the development, construction and operation of the greenfield project - the Noida International Airport. The company, a 100% subsidiary of Zurich Airport International AG, is responsible for the implementation of the public-private partnership project in close partnership with the Government of Uttar Pradesh and the Government of India. The concession period for Noida International Airport commenced on October 01, 2021, and will run for 40 years. At its opening, the airport will feature one runway and one terminal and handle a capacity of 12 million passengers – with the potential for further development in additional construction phases.
